## Pre-task: Familiarisation with the industry context

Paper Reference

**PXXXXXA**

## Instructions to students

The Part A Set Task Brief will be issued one week before the start of Task 1 to allow you to familiarise yourself with the industry context of the business.

You should complete your familiarisation during the window of [Day\_Month\_Year] to [Day\_Week\_Year].

During the pre-release window you should spend time becoming familiar with the ways in which digital tools and technologies are used within the identified sector.

You are advised to spend around 6 hours on this task but may choose to spend more time if you wish.

Your centre will schedule a minimum of 6 hours to allow you to complete your familiarisation.

You are permitted to:

- access to the internet
- work with others
- share and receive findings from the investigation you will be carrying out
- complete your investigation both during and outside of supervised sessions
- make notes about your findings.

You will not be allowed to take your notes into the supervised assessment sessions.

## Set Task Brief

You work for a software development company that has been commissioned to develop a digital solution to meet the organisation's needs. Your manager has asked you to work as part of a group of developers to investigate the use of digital in the finance sector in preparation for the start of the project and report back to your colleagues.

RBSX Group Ltd is an organisation that provides financial advice services to customers in the UK. The organisation currently relies on its advisors travelling to meet its clients in person.

After a review of its current digital solutions, the organisation has decided that it needs to develop a new solution.

The aims of the new solution are to allow:

- clients and advisors to communicate more effectively whilst reducing the need for travel to meetings
- clients to better access advice and recommendations about a range of financial services and products
- the advisors to:
  - access tools for carrying out financial analysis
  - help organise services around client needs (data analysis)

The requirements of the product are:

- an easy to use interface (GUI) with appropriate accessibility features
- provide two-way communication between advisor and client.
- ability for clients and advisors interact with a 'live feed' of financial information

## Activity

Working in teams of 4 to 6 people, you must familiarise yourself with the use of digital solutions in the retail sector.

To do this you may:

- use the information provided in the Set Task Brief
- carry out independent investigation
- share and receive findings with others.

You may wish to consider:

- data analysis and modelling
- data and information security
- stock control and point of sales systems
- online retail
- information needed for customer loyalty schemes.

## Outcomes for submission

The purpose of this pre-release is to enable you to become familiar with the ways in which digital is used within the identified industry.

You are not required to submit any evidence for this pre-release.

You are permitted to make notes during the pre-release period but will not be allowed to take these into the assessment.
